

K-REACH pre-registration status

Effective date: 31 August 2019

Supersedes: Not applicable

Dear customers:

Please be informed that INEOS composites have successfully completed pre-registrations under K-REACH for substances present in our products before the deadline (June 30, 2019), as you know the Korea Act on the Registration and Evaluation, etc. of Chemical substances (abbreviated as AREC, also known as K-REACH) has been amended and became effective from January 1, 2019, which requires to pre-register phase-in substances placed on Korean market at the volume of more than 1 ton per year.

OR approach

In order to support imports by our customers into Korea, pursuant to article 38 of K-REACH, INEOS Composites's composite business, globally and INEOS Composites's solvent business manufactured in Marl, Germany has appointed INEOS Korea REACH Co. to act as our Only Representative (OR).

Our OR only supports the business which exports from INEOS Composites to Korean based importers directly. Products purchased from INEOS Composites and subsequently exported into Korea (i.e., indirect imports) will not be accounted for in INEOS Composites's substance registration, which means INEOS Composites does not cover indirect business under umbrella of our OR. In order to ensure the sustainability of your business, we recommend you purchase product from INEOS Composites and import to Korea.

if you have any questions about K-REACH, please contact us at reach.composites@ineos.com.

Kind Regards,

Joey Zhang
Product Regulatory Manager, Asia Pacific
