INEOS Composites confirms REACH compliance for products placed on the European market

Dear valued customer,

This letter is to confirm to you that all the products we place on the European market are REACH compliant.

All substances contained in these products are registered by INEOS Composites or by INEOS's Composites suppliers (where not exempted from registration).

For polymers contained in our products, we can confirm that all monomers requiring registration have been registered by INEOS Composites or by INEOS's Composites suppliers.

REACH exemptions

Many of our substances are exempted from REACH registration for being naturally occurring, polymers (with monomers registered) or due to low volume.

REACH registration number

The REACH registration number is displayed in the European SDS, if a substance is registered and if the substance requires to be displayed in the SDS, either in section 1 (in case of substance) or in section 3 (in case of mixture).

While some of the substances contained in our products are manufactured by INEOS Composites, others are sourced from multiple third-party suppliers. It may take some time for our suppliers to inform us of their registration number(s), which we then have to administrate into our product SDS.

IMPORTANT DISCLAIMER

This information has been gratuitously provided by INEOS Composites. Although it is intended to be accurate, INEOS Composites DISCLAIMS ANY AND ALL LIABILITY, EITHER EXPRESS OR IMPLIED. This information is based on many factors beyond INEOS Composites' control, including but not limited to the completeness and accuracy of information received, or the conditions prevailing when operations were observed and/or sampled. In choosing to rely on or use this information, you assume all risk including the results obtained and agree to indemnify INEOS Composites against any and all claims. All recommendations or suggestions must be evaluated by you to determine their applicability or suitability for your particular program. Any information claimed by INEOS Composites to be confidential or proprietary is not to be disclosed to any third party.

REACH will continue to apply in the United Kingdom until the United Kingdom exits the European Union. REACH or REACH-type requirements may continue to apply after the United Kingdom exits the EU, however this is unclear at the moment. Once the consequences of the exit become clearer, INEOS Composites will decide on necessary steps to be taken.

INEOS is a Trademark, the property of INEOS Capital Limited.

Product Stewardship Summary

We anticipate that it may take considerable time before you see all relevant numbers displayed in our SDS for those substances that were only registered shortly before the last deadline.

In case of substances exempted from REACH registration or not required to be displayed in the SDS (e.g. not hazardous), there is no registration number to be shared. Would your company be subject to an inspection by authorities and require additional information on the registration status of one of the substances in our products, please send us an e-mail at below address and we will share relevant information with authorities directly.

End uses

We have assessed all relevant uses in our registrations and as well ensured that our suppliers have assessed relevant uses in their registrations. Section 1.2 of our SDS identifies the application(s) for which the product has been evaluated.

In case of a product composed of a single, registered substance an Exposure Scenario (ES) has been issued as an Annex to the SDS. The link to download the Annex from our web-site is included in section 16 of the SDS.

In case of mixtures containing one or more registered substances for which an ES have been generated, INEOS Composites has incorporated relevant use conditions in the main body of the SDS (section 8). We are working together with other members in the industry to develop processes and tools for the future incorporation of Exposure Scenarios for mixtures, either embedded in the SDS or as an annex to the SDS.

Substances of Very High Concern (SVHC)

INEOS Composites has procedures in place to ensure compliance with the REACH obligations of a supplier for proactively and reactively informing our customers in situations where SVHCs are present in our products.

INEOS Composites will provide you with the latest version of the SDS upon product purchase. If a SVHC is present in any of the products you purchase from INEOS Composites, the substance will be listed on the European SDS (at "any known concentration" equal to or greater than 0.1 %). Although not legally required, we are working on the reformulation of products containing SVHC, where reformulation would be valuable to both INEOS Composites and customer. In specific cases, we will contact you to review the options.

If you have questions regarding any REACH-related subject, please contact us via your INEOS Composites representative or send us an e-mail at reach.composites@ineos.com.

Kind regards,

Monica Adria

Product Regulatory Manager EMEA
