

Statement for Customers of INEOS Inovyn

INOVYN™, BIOVYN™, NEOVYN™ and RECOVYN™ PVC GRADES

Compliance with the REACH Regulation

INEOS Inovyn is committed to fulfilling its legal obligations under the REACH Regulation (Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals), whether acting as a Manufacturer, Importer or Downstream User, in full accordance with the Regulation.

INEOS Inovyn has completed numerous registrations of its substances and intermediates with the European Chemicals Agency (ECHA) and has played an active role in Substance Information Exchange Fora (SIEFs), including serving as lead registrant for several substances including vinyl chloride monomer used in PVC production.

All substances offered for sale, as detailed on our website, have either been registered under REACH or are exempt from registration. Substances supplied by INEOS Inovyn are supported by Safety datasheets that include the relevant REACH registration numbers and hazard classification, where applicable. These Safety Data Sheets are compiled in accordance with Article 31 of the REACH regulation, as amended. Several INEOS Inovyn products are manufactured by multiple legal entities within the Group. Where this applies, REACH registrations have been completed for each relevant legal entity. Should you require any further information, please contact your usual sales or technical service representative.

Yours faithfully,

Dr Maurice Newton

Head of Product Regulation, INEOS Inovyn
