To whom it may concern

**Re: REACH Regulation
INEOS Low Density Polyethylene
INEOS Linear Low Density Polyethylene grades
INEOS High Density Polyethylene grades
INEOS Polypropylene grades
INEOS Recycl-IN rLLDPE hybrid grades
INEOS Recycl-IN rHDPE hybrid grades
INEOS Recycl-IN rPP hybrid grades**

This statement provides the status of INEOS polyolefin products with respect to the EU REACH Regulation, in particular regarding three aspects that may be of concern to our suppliers and customers:

- registration status
- substances of very high concern (SVHC)
- the use communication

1. Registration status

We confirm that all the substances involved at whatever stage of our production processes are REACH compliant.

2. Substances of very high concerns

The European Chemical Agency (ECHA) regularly updates a list of SVHC (Substances of Very High Concern): http://echa.europa.eu/chem_data/authorisation_process/candidate_list_table_en.asp

We hereby confirm that none of these substances is used in our manufacturing process or have been detected by analysis in a concentration above 0.1% in any of the INEOS LDPE, LLDPE, HDPE, PP, and rLLDPE, rHDPE and rPP grades, and we are committed to inform our customers in case an addition to the list would become a concern.

Continued next page

3. Use Communication

We hereby confirm that all of INEOS LDPE, LLDPE, HDPE PP and rHDPE, rLLDPE and rPP grades are classified as non-dangerous substances (in accordance with Regulation (EC) 1272/2008) and are not assessed as PBT or vPvB substances¹.

Therefore, INEOS are not registrant of these substances and, as a consequence, **communication of uses does not need to be performed**, and INEOS aforementioned products can be used in any application, when not used in conjunction with any third party material.

Would you require any further information or assistance, please do not hesitate to contact us at: psnohreg@ineos.com

Yours faithfully,

Jacques Breulet
Regulatory and External Affairs Manager
INEOS Olefins and Polymers Europe
