INEOS STYROLUTION PUBLISHES 2019 SUSTAINABILITY REPORT

- Report outlines commitment and actions to transition to a circular and low-carbon economy
- Focus on expanding the Styrolution ECO portfolio of sustainable styrenics products

INEOS Styrolution's fifth sustainability report provides a comprehensive review of the company's environmental, social and governance (ESG) performance over the past year.

The report highlights INEOS Styrolution's strong focus on circular solutions with its expanding ECO family of sustainable products. Launched at the K-Show in October last year, the Styrolution ECO portfolio comprises styrenics products made from post-consumer recycled material as well as products made using renewable feedstock.

The report covers topics that are important to the company such as reduced carbon footprint, marine litter and pellet loss, health & safety, sustainable procurement, and fair business practices. It also contains special sections addressing the company's actions to combat the COVID-19 pandemic.

"We are committed to making a low-carbon, circular economy for styrenics a reality, help our customers to meet their sustainability targets, and make a positive impact on our planet and our people", says Steve Harrington, CEO INEOS Styrolution.

This report has been prepared in accordance with Global Reporting Initiative's (GRI) Standards, the most widely recognised reporting framework for sustainability.

About INEOS Styrolution

INEOS Styrolution is the leading global styrenics supplier, with a focus on styrene monomer, polystyrene, ABS Standard and styrenic specialties. With world-class production facilities and more than 90 years of experience, INEOS Styrolution helps its customers succeed by offering innovative and sustainable best-in-class solutions, designed to give them a competitive edge in their markets, and at the same time, help make the circular economy for styrenics a reality. The company provides styrenic applications for many everyday products across a broad range of industries, including automotive, electronics, household, construction, healthcare, packaging and toys/sports/leisure. In 2019, sales were at 5 billion euros. INEOS Styrolution employs approximately 3,600 people and operates 20 production sites in ten countries.
