

INEOS:

A strategically important UK company

INEOS is a cornerstone of the UK manufacturing sector, with unique and well-established supply chains. We operate the Forties Pipeline System, transporting North Sea oil and gas, and our Grangemouth site plays a pivotal role in supporting major manufacturing hubs across the north of England—strengthening national resilience and sustaining highly skilled jobs nationwide.

In Scotland, we produce the essential ingredients for manufacturing chemicals used in Runcorn, Hull, and beyond. Our strategic supply chains power British industry, delivering fuels, gases, polymers, and chemical building blocks vital for pharmaceuticals, electronics, construction, transport, and even clean drinking water—the everyday essentials we all depend on.

That's why now, more than ever, it's crucial to sustain and support these key UK industries.

INEOS in the UK

3500 direct employees

5 manufacturing sites

£11 billion invested Capital

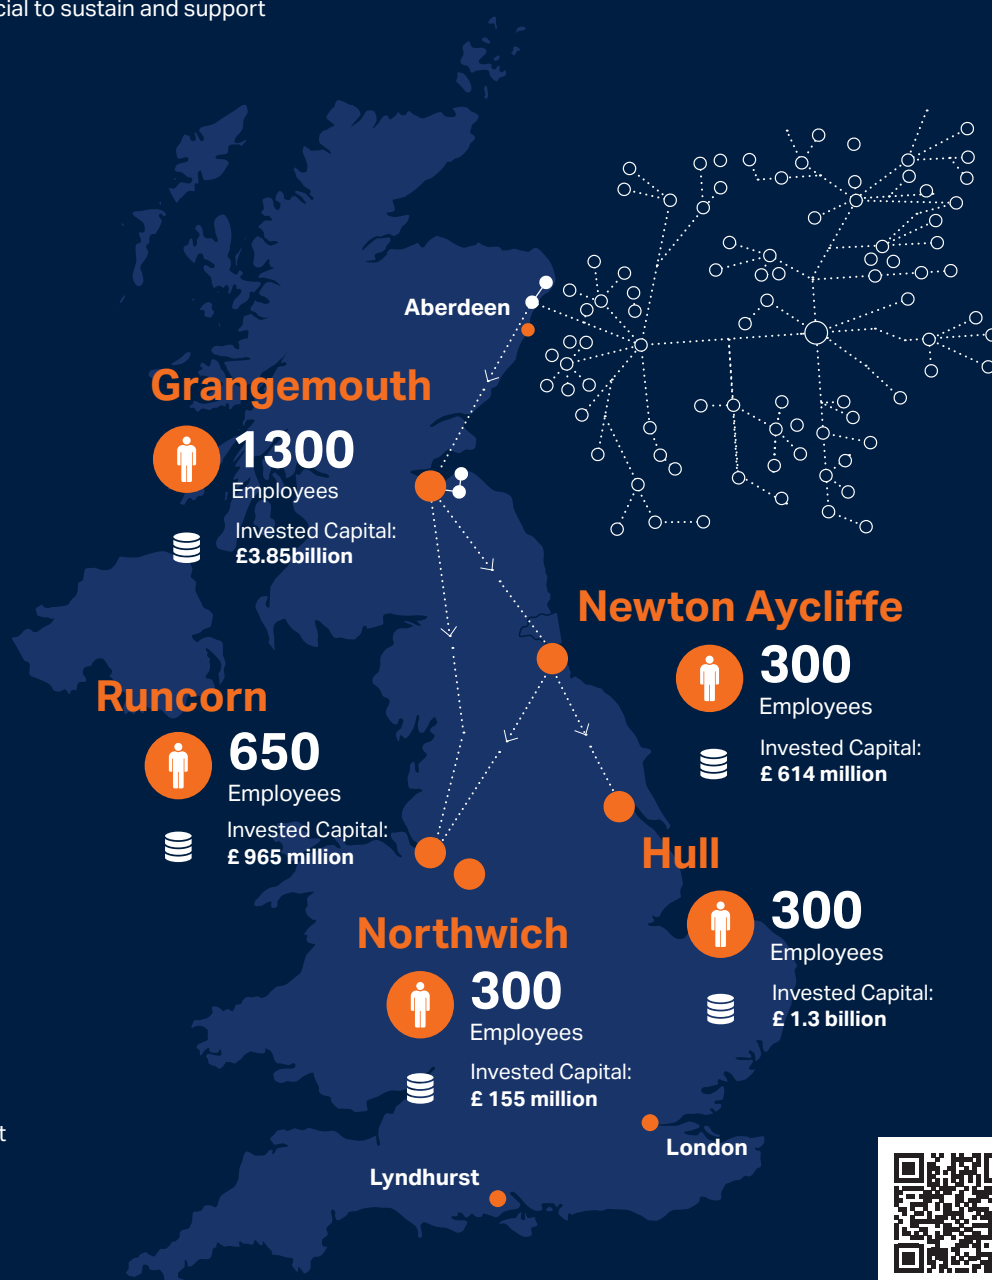

1500 km of pipelines
