# K44-15-122 Polyethylene Copolymer

K44-15-122 is a natural high density polyethylene copolymer designed specifically for extrusion of pressure pipe and tubing. When blended with an INEOS-approved black masterbatch, the resulting formulation (called K44-15-123) is listed in Plastics Pipe Institute (PPI) TR-4 as both a PE 3608 and PE80 material and is certified to NSF/ANSI Standard 14 and CSA Standard B137.1.

### Typical Properties<sup>1</sup>

|  | Values               |                     | ASTM         |
|--|----------------------|---------------------|--------------|
| Resin  | <b>English Units</b> | SI Units            | Method       |
| Density  | _                    | 0.944  g/cc         | D4883        |
| Melt Index 190°C/5.0 kg                            | _                    | 0.52  g/10  min     | D1238        |
| Melt Index 190°C/ 21.6 kg                          | _                    | 12 g/10 min         | D1238        |
| Compression Molded Sample                          |                      |                     |              |
| Tensile Strength (2 in/min)                        |                      |                     | D638         |
| @ Yield  | 3,000 psi            | 20.7 MPa            |              |
| @ Break  | 5,000 psi            | 34.5 MPa            |              |
| Elongation (2 in/min)                              | •                    |                     | D638         |
| @ Yield  | 11.2 %               | 11.2 %              |              |

#### **Regulatory Information**

The product and uses described herein may require global product registrations and notifications for chemical inventory listings, or for use in food contact or medical devices. For further information, call + 1-800-527-5419.

#### Health and Safety Information

The product described herein may require precautions in handling and use because of toxicity, flammability, or other consideration. The Material Safety Data Sheet (MSDS) contains the available product health and safety information for this material and can be found at **www.ineos-op.com**. Before using any material, a customer is advised to consult the MSDS for the product under consideration for use.

The Material Safety Data Sheet for this product contains shipping descriptions and should be consulted, before transportation, as a reference in determining the proper shipping description. If the material shipped by INEOS is altered or modified, different shipping descriptions may apply and the MSDS of the original material should not be used.
